Don's Water Supply Pty Ltd

Don's Water Supply Pty Ltd has been in operation since 1996.

We take pride in the work we undertake and are continuously improving and stream lining our business.

We are Health, Safety and Environment Contractor Prequalified and work alongside Programmed (PRA) and the Water Corporation in supplying scheme water to households, businesses, hospitals and schools when breakages and work programs require.

Don's Water Supply is a 24/7 operation and can supply the following;

- 3 x 13,000ltr water trucks fully equipped to supply potable water at a consistent high volume.
- Fully certified and trained operators to install and operate equipment and monitor operation.

We work in conjunction with two additional water carters giving us the capability to supply another 3 food grade lined trucks between 12,000 and 14,000 litre capacity.

In keeping with the Department of Health guidelines, Dons Water Supply has monthly tests conducted by Valle Agribusiness and Environmental Services. This is to ensure that the equipment we use and the water we supply meets all guidelines and is fit for consumption.

All reports are available on request.

All portable tanks/tankers are treated accordingly and food grade lined as required within the Department of Health guidelines.

BUSINESS CAPABILITIES & EQUIPMENT

- 3 x 13,000 Litre food grade lined water tankers and operators.
Additional 2 x 13,000 litre trucks can be engaged if required.
- 1 x 7,000 Litre food grade lined water tanker and operator.
- 4 x 9000 litre portable water tanks and pressure pumps. Access to an additional 4 x 9,000 litre portable tanks can be arranged as required
- 2 x 4500 litre portable tanks. Access to an additional 4 x 4500 litre portable tanks can be arranged.
- 2 x large single phase pumps (e.g. used to run golden ponds reception centre and caravan park and 11 units
- 5 x pressure pumps to supply residential properties.
- 1 x 400 litre portable water tank and pump (used to connect to small businesses)
- 1 x support vehicle to supervise and provide support to tanker operators and the client.
- 1 x 2 tonne enclosed trailer which contains an assortment of fittings and hoses to support the tankers. All fittings to connect up to 20mm,25mm,40mm,50mm,80mm,100mm meters
- **Access to Water Corporations Incident Management equipment (on availability)**

Each vehicle supplied by Don's Water Supply is equipped with a Hach Chloro-meter to ensure chlorine levels are monitored and maintained to the required levels.

All operators have received the training and competencies required to test and use the Hach Chloro- meter.

Water Tank Supply

We supply a variety of water tanks for short or extended periods of time for commercial and residential use. Tanks range from 4,500 - 10,000ltrs.

Pumps and fittings are included and connected to these tanks to supply household customers, restaurants and commercial operations.

We use scheme water to refill all tanks and follow our Drinking Water Quality guidelines.

PAST PROJECTS

The Mundijong trunk main was closed down for internal inspection and repairs over a two month period. Dons Water Supply was contracted by Western Water Services (John Forgione) to supply 14 portable water tanks and pumps to 9 property owners along Mundijong Rd as well as the Golden Ponds Restaurant, their grocery shop and 8 accommodation units. All of these tanks were fitted with pressure pumps and were supplied with water whilst keeping in contact with the property owners to make sure the job went as smoothly as possible. The Water Corporation were able to complete their job having minimal interruption to the supply of water to these properties.

Supply of Water under Pressure

Water supplied to Bunning's Maddington for 10 Hrs while mains repairs were conducted.

Supply water to the BP service station and surrounding fast food outlets in Bentley, while maintaining a consistent water pressure.

Using water tankers takes little time and makes connecting to a site easy whilst the Water Corporation carries out their work. Within 1 hour of the job being completed, trucks and equipment are removed from site eliminating the inconvenience to Water Corporation clientele.

Fire and Hot Works

ALL OF OUR OPERATORS ARE BUSH FIRE FIGHTER TRAINED

During the fire season when Water Corporation, Programmed PRA and other business owners are conducting hot works e.g.; welding, cutting or clearing land, Don's Water Supply's capabilities are used to help prevent the outbreak of fires.

Upon request, we supply our trucks to local fire brigades, DPaW, local Shires, D.F.E.S. and Water Corporation Incident Management. We are equipped and proficient in connecting to fire appliances and collar tanks for hellitaks. Our trucks have supplied water to tip fires, structural fires, the Dwellingup fires, Roleystone fires and the PIHA Industrial fires to name a few.

During the Dwellingup fires, we supported the fixed wing section of D.F.E.S for two days at the initial start of the fire. After the fixed wing had finished their job we then transferred over to ground support for the following 2 days, sleeping on site at Coolup fire station so the trucks were available to supply the fire appliances over night if the situation deteriorated.

AUBIN GROVE PRIMARY SCHOOL

- Supply mains water and fire service to the school.
- Once on site it was discovered that the water supply to the school and to the fire system was being disconnected whilst works were in progress. DFES were contacted and Dons Water Supply Pty Ltd liaised with DFES to connect the water tanker to the fire system so alarm systems would not be triggered and the school would maintain their fire system.

ORGANISE EMERGENCY WATER SUPPLY TO JARRAHDALE TOWN SITE

REF: John Forgione

Dons Water Supply Pty Ltd with the assistance of Mr Robert Annells, co-ordinated on behalf of PRA and The Water Corporation, the delivery and installation of Euro Tanks, Pumping Units and Generators, fencing and security of two locations In Jarrahdale.

- **Set up and connection to Water Corporation Assets, testing of the water system, flushing and hyper chlorination of Euro tanks.**

1ST LOCATION - CHESTNUTS – JARRAHDALE

- **Position 2 Euro Containers; connect gen-sets and pumps and all hoses.**
- **Hyper chlorinate tanks before use and remove hyper-chlorinated water to DEC holding tanks for use in there toilet system. This eliminated the chlorinated water being dumped and therefore removed any environmental impact that could have occurred if water was released into the environment.**
 - **Work area was secured with fencing**
- **Tanks and pumps were tested to ensure that they were operational if the need arose**

2ND LOCATION KINGSBURY DRIVE JARRAHDALE

- **Position 2 Euro Containers; connect gen-sets and pumps and all hoses.**
- **Hyper chlorinate tanks before use and remove hyper-chlorinated water to D.E.C holding tanks for use in their toilet system. This eliminated the chlorinated water being dumped and therefore removed any environmental impact that could have occurred if water was released into the environment.**
 - **Work area was secured with fencing.**
- **Tanks and pumps were tested to ensure that they were operational if the need arose.**

Mr Robert Annells from PRA, by request from Don's Water Supply, oversaw the operation and commissioned the systems.

Mr Chris Tait from Programmed, by request from Don's Water Supply, oversaw the HSE requirements.

Jarrahdale Emergency Water Supply

CITY EAST ALLIANCE (GREAT EASTERN HWY UPGRADE)

During the upgrades to the Great Eastern Hwy, Dons Water Supply Pty Ltd were contracted by PRA to supply scheme water to hotels/motels, escort agencies, restaurants and apartments blocks.

1 to 6 trucks up to 5 nights a week over a five month period supplying hotels, apartment blocks, restaurants, service stations, escort agencies, shopping centres, St John's Ambulance Head Quarters, Wilsons Security, Muzz Buzz, Ultra tune, Hungry Jacks, McDonalds, Kentucky Fried Chicken, and other assorted businesses.

This job consisted of removing meters, connecting to the various locations and supplying scheme water and maintaining an operational working pressure to the premises. On completion of the jobs we were required to disconnect and re- install meters.

During all night works we had our supervisor and support vehicle on site.

Sizes of Meters connected to: 20mm, 25mm, 40mm, 50mm, 80mm, 100mm and 50mm Scour Valves. Hydrants once hydrant coupling was removed.

ALBANY WATER CORPORATION

Ref: Tony Peplow

In March 2013 due to our high standards and reputation, Dons Water Supply commenced a working relationship with the Albany Water Corporation.

Since then, we have supplied tankers and light vehicles on 3 separate occasions sending our employees and vehicles to Albany and Mount Barker. During these operations we supplied Scheme Water to hotels, motels and service station roadhouses whilst the Water Corporation completed asset maintenance.

- Supply a utility with 400 litre tank to supply under pressure the Premier Hotel in Albany through a 25mm meter for a 10 hour period
- Supply two x 13,000 litre trucks to supply water under pressure to the Premier Hotel in Albany through a 25mm meter for a 10 hour period and also supply 170 meters of the 58AC water main in York Street, Albany through a 50mm scour valve

Date 14/07/13

- Supply two x 13,000 litre trucks to Mt Barker
Supply water under pressure to the United Fuel Station and restaurant through a 25mm meter and the Motel through a 50mm meter

Bridging Cable Connections

Please note:

Although all employees of Dons Water Supply have been trained in the use of bridging cables and the removal of Water Corporation Assets, they are unable to proceed without the direct consent of the supervisor.
